

Construction & Building Maintenance

At Byblos Constructions, we have been delivering quality building projects for our clients for over 30 years. In this time, our company has continued to diversify and innovate, providing a wide range of products and services to Western Australian clients. Companies such as Rio Tinto and the Department of Housing have trusted us with important projects right across the Pilbara in townships such as Paraburdoo and Tom Price, and mine sites including Paraburdoo, Tom Price, and Brockman 4.

From large-scale commercial and residential projects in Perth to multi-million dollar housing refurbishment projects in the Pilbara, our commitment to building quality and service has earned us an enviable reputation for getting the job done, on time, and above expectations.

Byblos Constructions offers a wide range of building services, including:

- Plumbing
- Carpentry
- Cabinet making
- Painting
- Tiling
- Concreting
- Machine operating
- Landscaping
- Asbestos removal
- Planning
- Scheduling
- Construction management
- Risk and safety management

Civil Works

For many years, Rio Tinto has engaged us as a trusted contractor to locate, excavate, remove and replace utilities services in the Pilbara.

The harsh environment and hard ground of the Pilbara has its challenges, requiring innovation and ingenuity when performing service location and replacement. It was this challenge that has led our company to the forefront of non-destructive service location through the use of hydro-vacuum excavation systems.

We can safely and effectively locate services such as communications, sewer, water, hydrocarbon and electrical.

Civil works services include:

- Non-destructive service location
- Water main repairs and installations
- Asbestos water main removal and replacement
- Sewer main replacement and installations
- General earthworks

Controlled Waste Management

We have been entrusted to manage the liquid waste of companies such as Rio Tinto, Monadelphous and OTOC in a number of Eastern Pilbara locations. As well as this, Rio Tinto owned mining camps at Jundamunnah and Kurra Kulli have relied on us to manage their Waste Water Treatment Plants servicing up to 1000 personnel each.

We are strongly committed to our environmental responsibilities and take pride in our exceptional track record of managing controlled waste for our clients.

Plant Hire

We have a range of plant for hire, including:

- Cat and Hitachi hydraulic excavators; 1.8t, 4t, 5t and 6t
- Skid steer loaders; Cat, Toyota Husky and John Deere
- Cat backhoes
- No Dig Equipment hydro-vacuum excavator systems
